**To:** LAFCo Commissioners**From:** Martha Poyatos, Executive Officer

A handwritten signature in black ink, appearing to read 'M. Poyatos', written over the printed name.

**Subject:** LAFCo File No. 15-01— Proposed Water Extension by the City of Redwood City to Assessor's Parcel Number 068-022-600 on Glenloch Way, Unincorporated San Mateo County, for Construction of a Single-family Home (0.29 acre)**Summary**

Pursuant to Government Code Section 56133, Commission approval is required for extension of service by local agencies to territory outside the agency's boundaries. This section requires that the public agency apply to LAFCo by resolution on behalf of the landowner. In this case, the City of Redwood City has applied for extension of water service on behalf of the owner of an existing parcel on Glenloch Way in Unincorporated Emerald Lake Hills. A water connection is a County of San Mateo Building Department condition of approval for new construction on the parcels. The project area is within the sphere of influence (SOI) of the City of Redwood City and the City's water service area. Commission approval is recommended.

**Staff Report and Recommendations**

This proposal was submitted by resolution of the City of Redwood City as a condition of approval by the San Mateo County Building Department for construction of a single family home. The property is within the SOI of the City of Redwood City and the City's water service area. The parcel is not contiguous to the City boundary and therefore not eligible for annexation.

San Mateo County Environmental Health reports that the City of Redwood City provides water and that the Emerald Lake Heights Sewer Maintenance District provides sewer service in the area. The proposal has no adverse environmental health significance and there are no registered voters in the subject territory.

**California Environmental Quality Act**

Water extension to the parcel is exempt from the California Environmental Quality Act (CEQA) pursuant to Section 15303, Class 3, relating to new construction or conversion of small structures.
