Hi Bob,

Ok I asked them not to go on the property. They were just worried about fire hazard. Please keep the site clean and free of tree debris and trash. Please add more trash cans with lids if that will help you to better control the trash (loose bags of trash are not acceptable due to critters).

Thank you

Hello
The men are sending photos of silt fence repairs on lots 9 -10 - 11 and the addition of more wind screen on 11
We found two green branch trimmings on lot 11 at the very bottom of the lot and we removed them however to get a view of them the person had to trespass
Fair Warning We will file Charges in the future
We are installing fence with gates Monday could not do this until now as we needed access

Hi Bob and Noel,

Please address the trash and tree debris issue at your earliest convenience. I heard more lighting may occur this weekend. Please make sure you have a debris box at the Lot 9/10 site and at Lot 11.

Thanks

Thank you Camille for letting us know.

With all the fires in California and Cal Fire being spread so thin -
Don't you think that Nexgen is risking a lot for a little ?
One spark and our entire canyon could go up in flames.

Can you think of anyway we could suspend the building until this fire danger is over ?

<DSC_0390[3].jpg>

When Mr. Chamberlain was surveying the area, he cut down lots of branches and just left them.
I dragged all the fire fuel up the hill and filled up our green compost bin every week.
I don't think he has the best interest of The Highlands at heart.

One more thing -

There is still lots of garbage (plastic bottles & cans, food containers, egg shells, pizza boxes)
strewn over the build site.

Easily seen from Ric Alderman's garden.

We are also seeing evidence of rats !!!

We appreciate you having the dumpster delivered. Now if we can just get the guys to use them
!!!

Please see what you can do.

Thank you, Deke & Corrin

Hi Deke and Corrin,

I wanted to give you a heads up that there will be some light work tomorrow (Saturday) on Lots 9-11 to repair/replace erosion measures. The corrections being made are required by the County and SWCA and are required to protect from tracking and stormwater pollution. No large equipment would be used, and all work would be limited to hand tools, and erosion measure repair; I will emphasize this with the applicant.

Thank you

Hi Camille,

I just received a call from Bob requesting permission to work on Saturday (tomorrow 8/22/2020) to address the below BMP repairs. He has been short handed this week, but said his labor team would be available tomorrow for a half day of work. No large equipment would be used, and all work would be limited to hand tools, and BMP repair.

Per Mitigation Measure NOI-1 : The construction activity would be kept to the hours of 7:00 AM to 7:00 PM, Monday through Friday. Saturday hours (8:00 AM to 5:00 PM) are permitted upon the discretion of County approval based on input from nearby residents and businesses. Saturday construction (8:00 AM to 5:00 PM) would be allowed once the buildings are fully enclosed.

Please let me and Bob know if this would be acceptable to the County, as work would be limited to BMP repair.

Thanks so much,

Jessie Henderson-McBean

Subject: Highland Estates Site Visit 8/19/2020

Hi Bob,

As we discussed onsite yesterday, please address the following action items no later than the end of this week.

Lots 9/10

- **Silt Fence Repair** - The silt fence is still in need of repair on the northeast corner of Lot 10, and along the eastern slope of Lot 10. This is an ongoing issue which we have discussed many times. Please send a photo on Friday showing this completed repair.

Lot 11

- **Repair tree protection fencing on the south east corner** – Please ensure that all trees are protected with 4-foot tall fencing to ensure that no impacts occur to trees onsite. This fencing must be in place to protect the trees as well as the woodrat nest located adjacent to the site. As we observed yesterday, this fencing has been removed and was laying on the ground next to the woodrat nest at this location. This must be fixed ASAP. Please send me a picture of this repair by Friday.
- **Repair chain link fence next to willow trees** – The chain link fence has fallen down and had a large hole opened up in it. This chain link fence is a requirement of the project to protect the riparian zone along the southern side of Lot 11.
- **Repair silt fence next to willow trees** – Silt fence has been damaged along the entire southern side of Lot 11, and has been knocked over by dirt. This was reported by both myself and Neil Trennery (QSP). Please ensure that this silt fence is repaired ASAP as it is protecting the riparian zone along the southern side of Lot 11.

- **Remove the laser from the oak tree** – Please remove the laser that has been attached to the oak tree on the North side of Lot 11. This tree has been protected as part of the tree protection plan, and should not be unnecessarily damaged.
- **Track out** – There was significant track out on Cowpens Way near the entrance of Lot 11. Please ensure that you are sweeping public streets daily with water sweepers if any visible soil material is carried onto streets. Below is the specific language requirement for Mitigation Measure AQ-1:
 - *Sweep daily (with water sweepers) all paved access roads, parking areas, and staging areas at the construction sites.*
 - *Sweep public streets adjacent to construction sites daily (with water sweepers) if visible soil material is carried onto the streets.*
- **Utilize or Expand the Stabilized Construction Entrance** - The construction entrance has been installed, but is not being used by traffic entering and exiting the site. Please either expand the entrance so that you are using it, or ensure that all traffic is using this entrance point as the only entry/exit to the site.

Please let me know when you have completed all action items on this list, or if you have any questions.

Thanks so much,

Jessie Henderson-McBean
